DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Brenny et al (US 5,839,377).

Brenny discloses a device for applying and removing rail clips connected to a railroad crosstie. The device is comprised of a tool frame 20 which supports two tool levers disposed opposite each other on either side of a rail. The frame and levers are shown in figure 2. The tool levers are further comprised of pressing members 148 and shown in figure 4. The levers are moved in to place by lever bearings 142 and 144, which allow the pressing members to move in towards the rail and the clip or away from the rail and the clip. A center guide bars 120, 124 move the lever bearing and pressing members in to place and also allow for movement of the two tool levers. The tool levers are also comprised of four boreholes, which accept locking bolts to hold the levers to the frame.
